creating a fearless environment

CONSTRUCTION

YOU CAN'T PROTECT YOUR SITE ALL THE TIME, BUT NETWATCH CAN....

Netwatch provides a security solution that makes financial sense for your business.

Construction sites pose a number of significant security challenges, as they are often located in areas that are surrounded by farmland and open fields. In addition, thieves can easily scale walls and commercial wrought-iron fences that protect such sites with access roads and rail lines providing thieves with easy access and a quick getaway. Given the value of the tools and equipment, higher levels of loss prevention measures are desperately needed.

Netwatch specialise in security and protection, provided through remote visual monitoring from our state of the art Communication Hub. We can offer personalised solutions to meet the security needs of businesses just like yours.

why netwatch?

Many traditional forms of security, such as CCTV, only record events as they happen. By the time you become aware of the crime the the damage is done.

Netwatch offers a proactive solution, preventing crime, not just recording it. Netwatch provides extremely cost effective monitoring and remote control of site activity, 24 hours a day. If your site perimeter is breached, Netwatch Communication Hub issues the intruders with a live personalised audio warning, deterring them before a crime is committed.

DON'T JUST TAKE OUR WORD FOR IT – READ WHAT ONE OF OUR CUSTOMERS HAS TO SAY...

“ Bennett Construction Ltd have been working with Netwatch for many years now, supplying us with monitored CCTV security on our various construction sites and compounds in Ireland and the UK.

All in all I can't speak highly enough of their continued service and staff that they employ, as no job is ever too big or too small for Netwatch. They continuously push the boat out with the service they provide and will always assist us in finding solutions to various problems that can occur on site, even problems that don't always relate to CCTV monitoring.

Netwatch offers us the peace of mind that our sites are being monitored in a professional, secure and cost effective manner. When comparing to manned guards, who quite simply can't be everywhere at the one time, Netwatch cameras are monitoring and recording entire sites 24/7.

Niall Cuffe, Bennett Construction
